

SAVE-T® Dock Lights

Save-T LED DOCK LIGHT HEADS

This new LED light outlasts up to 25 incandescent lights, and eliminates high maintenance costs associated with repair and replacement of traditional dock lights. LED Dock Lights are made using a PAR 38 LED bulb with a choice of single or double strut arms. This light also comes in an Ultra Heavy-Duty model. Optional fans and secure wire guards are available.
Head Diameter: 8".

Save-T POLYMER DOCKLITE® HEADS

The Polymer Docklite Head has a cool-to-the-touch head that deflects and dissipates heat and prevents denting.
Head Diameter: 8"; Compatible with standard Phoenix arms.

Save-T FLUORESCENT DOCKLITE® HEADS - Energy Savings

The self-ballasted compact fluorescent light head allows for up to 75% energy savings each year. The cool-to-the-touch light head is also impact resistant.
Energy savings rebates may be available!
Head Diameter: 8"; Compatible with standard Phoenix arms.
