## CUT TO FIT PANEL FOR IN-THE-FIELD CUSTOMIZATION

Panels can be cut with 2" adjustability

Stock panels can be shortened in width by using XGBC Kit which contains bolt-on clips to replace the standard welded clips.

Once the panel has been cut, replace the welded clip with the two piece bolt on clip. Each kit contains 3 left hand and 3 right hand clips. One kit can modify both the upper and lower panels on an 8' high system and 2 panel sections on the 6' high system.

### CHALICE BOLT AND BREAKAWAY NUT

These two-piece bolt-on clips are attached to the panel with special break-off nuts. Once the clip is assembled, it is permanently in place.
